# CERT Monthly Safety Tip

## Video Inventory

Living in Florida, there are numerous disasters that can occur: tornadoes, hurricanes, flood, wildfire, and hazardous materials. Any of these disasters could involve damage to personal property and could sadly, be a complete loss. Insurance provides some financial assistance toward replacement of your losses, but you will still need to provide a detailed list of EVERY ITEM you are claiming. This ordeal is overwhelming enough with pictures. Can you imagine having to do it without them?

## Take Videos With Your Phone

Using your phone is a good way to get your video inventory. It is suggested that you take a video for each individual room instead of one, long video. Open all drawers, cupboards, under sinks; open stored boxes (or mark boxes clearly with contents), and closets. Make sure to include the garage and take a video of the lanai and the rest of the house outside as well.

## Update Videos Once a Year

Set a date on your calendars each year to update videos. Waiting until you're preparing for a potential disaster and getting ready to evacuate is not the time to be taking the videos.

Meet us on Thursday, Sept 15 at 10am in the Card Room next to the Wi-Fi cafe. Contact Lyle Weissbach at [fetzer3@aol.com](mailto:fetzer3@aol.com) to join CERT!
