

CERT Monthly Safety Tip

Video Inventory

Living in Florida, there are numerous disasters that can occur: tornadoes, hurricanes, floods, wildfires, etc. These disasters could involve damage to personal property and could sadly, result in a complete loss. Insurance provides some financial assistance toward replacement of your losses, but you will still need to provide a detailed list of EVERY ITEM you are claiming.

Take Videos With Your Phone

Using your phone is a good way to get your video inventory. Take a video for each individual room instead of one, long video. Open all drawers, cupboards, under sinks; open closets and stored boxes (or mark boxes clearly with contents). Make sure to include the garage and take a video of the lanai and the rest of the outside of your house as well.

Set a date on your calendar each year to update videos. Waiting until you're preparing for a potential disaster and getting ready to evacuate is not the time to be taking the videos.

Del Webb CERT provides safety education and training. Check out more on our website: DelWebbLWRCERT.org
